

48.9 dBu service contour

STROUD BROADCASTING · FACILITY 795621

Fox Gap Channel 16

Predicted coverage at 15.0 kW ERP, directional, aimed north. TVStudy v2.3.0, Longley-Rice, FCC LMS data of 2 August 2026.

POPULATION SERVED

225,914

INSIDE CONTOUR

250,507

SERVICE AREA

1,290 sq mi

PEAK ERP

15.0 kW

COVERAGE

Almost all the power is directed north across Stroudsburg and East Stroudsburg, 3.4 miles from the transmitter on a bearing of 352°. The contour reaches 35 miles north and closes to 8–13 miles on every other side, which is what keeps the station clear of the Philadelphia and Scranton markets.

Shaded area is the predicted service contour, computed from terrain along 360 radials. Coverage inside it varies with local terrain. County and interstate data from US Census TIGER 2023.
