

50.2 dBu service contour

Camelback Channel 29

Predicted coverage at 15.0 kW ERP, directional, aimed northwest. TVStudy v2.3.0, Longley-Rice, FCC LMS data of 3 September 2026.

POPULATION SERVED

156,594

INSIDE CONTOUR

168,993

SERVICE AREA

811 sq mi

PEAK ERP

15.0 kW

COVERAGE

Power is directed northwest, up the Pocono plateau toward the Wyoming Valley. The contour reaches 26.5 miles that way and closes to 10-13 miles to the east and south, where it stays clear of the Philadelphia market and of our own Fox Gap signal. Antenna 120 ft above ground at 2,148 ft AMSL.

Shaded area is the predicted service contour, computed from terrain along 360 radials. Coverage inside it varies with local terrain. County and interstate data from US Census TIGER 2023.

41 2 39.67 N 75 22 37.80 W (NAD83) · 2,148 ft AMSL
